

Summer Math Work for Rising 5th, 6th, 7th, & 8th graders

Stay mathematically sharp over the summer! Students already enrolled at St. Benedict Catholic School received a grade-specific summer work packet comprised of 100 review questions (120 for accelerated 8th) before they departed for the summer. Each section is accompanied by step-by-step instructions and a worked example.

Due to copyright of the materials we are not able to post it on the website...Sorry! If you need a new copy of the work or are new student entering grades 5 – 8, please email both a.smith@stbens.net and s.heath@stbens.net for a packet. They can also answer any questions you may have about the work.

Summer Math packets will be due no later than September 6, 2019.

Thank you.
